## ENG 1440 Assignment #6

<p>1. Compute the reactions at the support O. The force loads shown lie in a vertical fixed plane.</p>	
<p>2. Neglecting friction and the radius of the pulley, determine (a) the tension in cable ADB (b) the reaction at C.</p>	
<p>3. For the frame shown, determine the reactions at A and C</p>	
<p><b>BONUS:</b> In the figure shown, the man has a mass of 70 kg, and the system is in equilibrium. Find the force of the rope at A. Ignore the mass of the beam and the pulley.</p>
