Instructions:

1.

One hand-written single-sided reference page (8.5" by 11") is permitted. This information page must contain your name and student I.D. number.
2.

No other aids are permitted.
3.

Attempt all problems. Show all your work.
4.

Write your solutions in the space provided. If insufficient space is provided for your solution to a problem, continue your work **on the back of the previous page**, indicating in the bottom right hand corner that work is continued on the back of the previous page.
5.

Fill in the information requested below.
6.

Put your student number on each page in the space provided.

Student Name (Print):

Student Number:

Student Signature:

(I understand that cheating is a serious offense.)

Seat Number:

<i>problem</i>	<i>mark</i>
<i>1</i>	<i>/11</i>
<i>2</i>	<i>/9</i>
<i>3</i>	<i>/10</i>
<i>4</i>	<i>/9</i>
<i>5</i>	<i>/10</i>
<i>6</i>	<i>/9</i>
<i>7</i>	<i>/7</i>
<i>8</i>	<i>/13</i>
<i>9</i>	<i>/12</i>
<i>TOTAL</i>	<i>/90</i>

THE UNIVERSITY OF MANITOBA

11 December 2006 (afternoon)

PAPER NO.: 200

DEPARTMENT & COURSE NO: Mathematics - MATH 1210

EXAMINATION: MATH 1210 - Techniques of Classical & Linear Algebra

FINAL EXAMINATION

PAGE NO.: 2 of 10

Time: 2 hours

EXAMINER: T. G. Berry

VALUES

Student number: _____

- [11]
1.
- Use the Principle of Mathematical Induction to show that , for n any positive integer

$$\sum_{\ell=0}^{2n-1} (3\ell+1) = n(6n-1) \text{ .}$$

THE UNIVERSITY OF MANITOBA

11 December 2006 (afternoon)

FINAL EXAMINATION

PAPER NO.: 200

PAGE NO.: 3 of 10

DEPARTMENT & COURSE NO: Mathematics - MATH 1210

Time: 2 hours

EXAMINATION: MATH 1210 - Techniques of Classical & Linear Algebra EXAMINER: T. G. Berry

VALUES

Student number: _____

[9] 2. Consider the complex numbers

$$z_1 = \sqrt{2}(1+i) , \quad z_2 = 3i \quad \text{and} \quad z_3 = \frac{1}{4}(-1+i\sqrt{3}) .$$

(a) Express each of these numbers in exponential form.

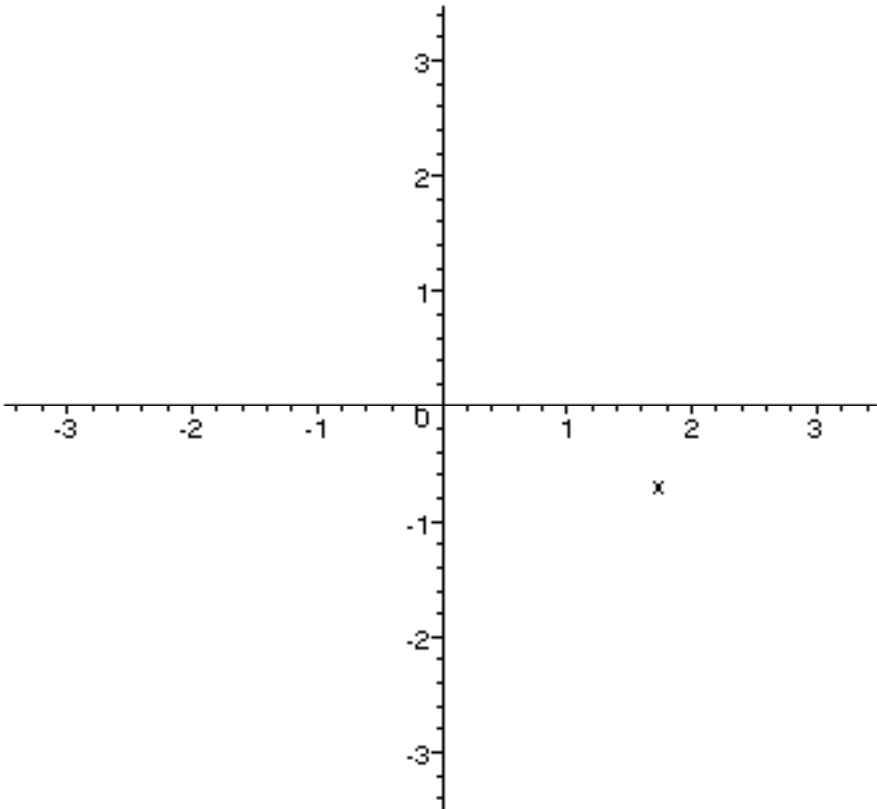

(b) Evaluate $\frac{z_1^3 z_3}{z_2}$, expressing your answer in exponential form and simplifying the result as far as possible.

VALUES

Student number: _____

- [10] 3. Consider the complex polynomial equation $z^4 = 16e^{i(3\pi/4)}$.
- (a) Find the modulus and the principal value of the argument of each of the roots of this equation.

- (b) Plot the roots determined in part (a) on the following diagram.

THE UNIVERSITY OF MANITOBA

Time: 2 hours

EXAMINATION: MATH 1210 - Techniques of Classical & Linear Algebra EXAMINER: T. G. Berry

VALUES

Student number: _____

- [9] 4. Consider the polynomial $P(x) = 2x^3 + x^2 + 5x - 3$.
- (a) List all possible rational roots of $P(x) = 0$, as indicated by the Rational Roots Theorem.
- (b) What is the maximum number of negative real zeros that $P(x)$ can possess, according to Descartes' Rule of Signs?
- (c) Clearly Descartes' Rule of Signs indicates that $P(x)$ can have at most one positive real zero. Find it.
- (d) Use the above information to find the remaining zeros of $P(x)$.

FINAL EXAMINATION

PAPER NO.: 200

PAGE NO.: 6 of 10

DEPARTMENT & COURSE NO: Mathematics - MATH 1210

Time: 2 hours

EXAMINATION: MATH 1210 - Techniques of Classical & Linear Algebra EXAMINER: T. G. Berry

VALUES

Student number: _____

[10] 5. Given $A = \begin{pmatrix} 2 & 1 \\ -1 & 1 \end{pmatrix}$, $B = \begin{pmatrix} 1 & 3 \\ -1 & 0 \\ 2 & 1 \end{pmatrix}$ and $C = \begin{pmatrix} 1 & 1 & -1 \\ 1 & 2 & 0 \end{pmatrix}$, find

(a) $A(B - C^T)^T$

(b) $(CB)^{-1}$

VALUES

Student number: _____

[9] 6. Consider the matrix

$$\begin{pmatrix} 1 & 0 & 0 & 0 & 4 & -2 \\ 0 & 3 & 3 & -6 & 0 & 3 \\ 0 & 0 & -1 & -4 & 0 & 0 \\ 0 & 0 & 0 & 0 & 1 & 2 \\ 0 & 0 & 0 & 0 & 2 & 6 \end{pmatrix}.$$

- (a) Reduce this matrix to row-echelon form (REF), indicating clearly all elementary row operations (ERO) used to do so. (You may combine some opearitions if you wish, as long as you indicate which operations you use.)

- (b) Assuming that this matrix is the **augmented matrix** of a **non-homogeneous linear system** of equations of the form $Ax = b$, fill in the following table:

# of variables in this system	
rank of the augmented matrix	
rank of the coefficient matrix	
# of "free" variables in this system	
# of solutions possessed by this system	

- (c) Assuming that this matrix is the **coefficient matrix** of a **homogeneous linear system** of equations of the form $Bx = 0$, fill in the following table:

# of variables in this system	
rank of the augmented matrix	
rank of the coefficient matrix	
# of "free" variables in this system	
# of solutions possessed by this system
